

NORBERT KUŁAK

FULL-STACK DEVELOPER

norbert-kulak.com

SUMMARY

Full-stack developer with 6+ years of commercial experience building web applications in React, Next.js and TypeScript, also delivering backend features in NestJS and GraphQL. Works daily with AI coding tools (Claude Code) in a spec-driven workflow with manual review of every change.

EXPERIENCE

FULL-STACK DEVELOPER

Dev and Deliver | 01.2021 - Present

AI roleplay platform
Built AI character chat with streaming and text-to-speech, an interactive adventures module with an LLM-based creator, Stripe subscriptions and native app integration, plus the backend for these features.

Marketplace for booking freelance bartenders (Danish market)
Sole frontend developer of the platform. Designed and delivered the Sanity CMS integration with a new landing page and content section, and a full-stack reviews and ratings system with admin moderation.

ESG and compliance SaaS platform
Platform of 15 React micro-frontends. Bootstrapped five new apps and led frontend work on the ESG metrics, engagement, disclosures and surveys modules: ESG questionnaires and dashboards, spreadsheet and xlsx data entry, MFA flows.

JUNIOR FULL-STACK DEVELOPER

Nextrope | 06.2020 - 01.2021

React and Redux frontends, Node.js backend (LoopBack, TypeScript), blockchain integration with web3.js.
